

ShopSphere E-commerce App Documentation

****Author****: Esmael Mosad

****Introduction****

ShopSphere is a full-stack e-commerce app built with React, Firebase, and Stripe. It supports user authentication, cart management, payments via Stripe, and order history, styled with Tailwind CSS, Created as a task for interview at **zimozi company**

****Features****

- Login: Google/email via Firebase (`src/Login.tsx`).
- Cart: Real-time updates (`src/CartPage.tsx`).
- Checkout: Stripe payments (`src/CheckoutPage.tsx`).
- Order History: Error-handled (`src/OrderHistory.tsx`).
- Storage: Images via `posting.cc` (`storage.rules`).

****Technical Design****

- Frontend: React, TypeScript, Tailwind CSS (`src/`, `tailwind.config.js`).
- Backend: Firebase Functions (`functions/`).
- Database: Firestore (`src/firebase.ts`).
- Storage: `posting.cc` workaround (replaced Firebase Storage).
- Payments: Stripe API integration.

****Development Process****

- Tools: Vite, Firebase CLI, VS Code.
- Challenges: Login redirects, Stripe payments, data refresh.
- Solutions: Fixed Auth redirects, debugged Stripe, persisted data.

****Setup Guide****

1. Clone: `git clone https://github.com/esmael889/ecommerce-app.git`
2. Install: `npm install` (root), `cd functions && npm install`.
3. Configure: Add `.env` (see README).
4. Run: `npm start`, `firebase deploy --only functions`.

****Reflection****

Learned React, Firebase, and Stripe integration. Future: Add search functionality.
